

Why 100% Web Software?

It distributes automatically and is scalable to the largest organization.

A web browser user interface is easy for everyone to use, at any time, from anywhere in the world.

PlanView's business logic is centered in the server:

Critical Path Method, Resource Search, Resource Scheduling, Progressing Engine, Collaboration Gateway, Data Gateway, and Time Reporter Gateway—all instantly available to the full enterprise.

HomeView™ — Your Portal to Rich Enterprise Services

A single log-on takes you to a home page project management portal with access to software tools from PlanView and others as well as alerts, reminders, favorites and a lot more!
